SUMMARY

Passionate full-stack developer with a focus on back-end development. Experienced in Ruby on Rails, JavaScript, React, and Redux. Skilled in developing complex, performant, and user-friendly front-end solutions. Strong teamwork and remote collaboration abilities. Committed to delivering high-quality code and creating optimal user experiences.

SKILLS

Front-End & Technology: JavaScript, React, Redux, jQuery, HTML5, CSS3, Webpack, API, REST

Back-End: Ruby on Rails, PostgreSQL

Testing Frameworks: Mocha, Jest

Tools & Methods: Git, GitHub, Bitbucket, Heroku, Netlify, Mobile/Responsive, Chrome Dev Tools, MVC, TDD, Kanban Board

Professional: Remote, Pair-Programming, Teamwork, Code Reviewer

EXPERIENCE

Front-End Developer Intern at Groflex   Feb 2023 – Present
- Collaborated with international remote developers to enhance the Groflex website using JavaScript, React, API, and Redux.
- Improved application performance through optimization techniques learned from senior developers.
- Developed strong communication and collaboration skills through daily stand-ups.

Volunteer as Teacher at ReDI   March 2023 – Present

- Conducted lectures, discussions, and problem-based learning sessions for HTML, CSS, and version control courses.
- Provided hands-on assistance to students for a maximum of five hours per week.
- Enhanced communication skills and gained confidence through teaching responsibilities.

HIGHLIGHTED PERSONAL PROJECTS   Remote

Freelancer Full-Stack Web Developer   October 2022 – April 2023

I-Qoom
- It is a project management app to manage projects and all tasks related to projects. I built its contract management part.
- Built with: (React,Redux, Ruby, PostgreSQL, HTML/CSS, JavaScript)
- View Live

Full-Stack Web Developer   May 2021 – April 2022

[Math Magician](#)
  - Built a Single Page App (SPA) using React, HTML/CSS, and JavaScript.
  - Allowed users to make simple calculations.
- Built with: (React, HTML/CSS, JavaScript)
- [View Repository on GitHub](#)

[Restaurant Capstone](#) —The JavaScript capstone project is about building our own web application based on an external API. The web app has 2 user interfaces, a Home Page displaying items you can like and a Comment button on the home page displaying a Popup window with more detail about the item.
- Built with: (HTML/CSS, JavaScript, Webpack, API, and Jest)
- [View Repository on GitHub](#)

[Doctor Appointment App](#) – Doctor Appointment is a React frontend application I built for booking an appointment with a doctor. This responsive application allows users to load, create, and delete doctors and appointments.
  - Built with: (React, Redux, Ruby on Rails, Postgresql, Bootstrap, and API)
  - [View Repository on GitHub](#)

[Todos](#) — "Todos" is a website for saving users all to-do lists. A Single Page App (SPA) allows users to add, delete, and edit tasks. Users can also mark tasks as completed and save them in local storage.
- Built with: (React, HTML/CSS, JavaScript)
- [View Repository on GitHub](#)

[Awesome Books](#) — The Bookstore is built with react-redux. It allows you to add a book, display a list of books, and remove a selected book.
- Built with: (HTML/CSS, JavaScript, local storage)
- [View Repository on GitHub](#)

EDUCATION

MICROVERSE   May 2021 – August 2022
Remote Full Stack Web Development Program, Full Time
- Learned more than 5 coding languages in only 8 months.
- Developed multiple projects with Ruby, Rails, JavaScript, React, and Redux.
- Spent 1300+ hours mastering algorithms, data structures, and full-stack development.
- Acquired skills in remote pair programming using GitHub and demonstrated expertise in version control with industry-standard git-flow.
- Developed communication and collaboration skills with international remote developers through daily stand-ups.

PUNJAB UNIVERSITY GUJRANWALA CAMPUS
BS-Information Technology   October 2015 – June 2019
- Learned DSA, Database Systems, OOP, ERP, SQA, and Digital Logic Design.
- Develop communication, teamwork, and leadership skills as a group leader in projects.
